Anacacho Orchid Tree

Bauhinia lunarioides
Anacacho Orchid is a great small flowering tree for Central Texas landscapes. It reaches only 10 feet in height and provides a light to medium shade. The foliage is interesting, as the split leaves resemble a cloven hoof. Does best in full sun

Texas Mountain Laurel

Sophora secundiflora

LARVAL HOST for Bordered Patch butterfly; from www.wildflower.org: very popular as a native evergreen ornamental tree, valued for its handsome, dark green foliage and lush early spring blooms. It is drought-tolerant.

Bottlebrush

Callistemon rigidus from

www.magnoliagardensnursery.com: This Bottlebrush has a bushy growth habit with stiff stems and stiff linear shaped leaves and will do best on a well-drained soil. In the summer this Callistemon will bloom sporting bright red flowers.

Little Gem Magnolia

Magnolia grandiflora 'Little Gem' from

www.magnoliagardensnursery.com: The Little Gem Magnolia grows in a more compact and upright form than other Southern Magnolias; with small oval dark green leaves with characteristic long rusty-brown undersides.

Brazilian Pepper

Schinus terebinthifolius
DO NOT PLANT. Alternative is
Wax Myrtle; Gene Blacklock
w/Coastal Bend Bays & Estuaries:
mainly a problem along the
immediate coast. Aggressive, birds
like the berries.

Orchid Tree

Bauhinia variegata from www.floridata.com: Orchid tree is used as a street tree or a shade tree. It bears beautiful fragrant flowers abundantly in late winter and early spring and intermittently through summer. Orchid trees have brittle branches.

Mexican Buckeye

Ungnadia speciosa from http://aggiehorticulture.tamu.edu: Pink flowers bloom simultaneously as it leafs out with light bronze colored leaflets fall color is golden yellow. Used as a large multi-trunk shrub or trained into a small tree. Not related to Ohio Buckeye.

Wax Myrtle

Morella cerifera
from article in Rockport Pilot by
Ernie Edmundson: Is found
growing wild in coastal areas most
often in low-lying moister areas, but
will adapt to dryer conditions and,
like the other understory trees, in
the shadow of live oaks.

Chinese Tallow

Triadica sebifera
DO NOT PLANT. Alternative is
Chinquapin Oak; Gene Blacklock
w/Coastal Bend Bays & Estuaries:
a serious problem for the Upper
Texas Coast and elsewhere east of
Texas. Locally a problem here,
becoming more common.

Desert Willow 'Bubba'

Chilopsis linearis 'Bubba' from http://tree-land.com: The Desert Willow 'Bubba' has become one of the most popular Chilopsis linearis cultivars because of it's beautiful and fragrant trumpet shaped pink-burgundy flowers. No seed pods.
