

# Little Volcano Lespedeza

*Lespedeza liukiuensis* 'Little Volcano'

A graceful, deciduous shrub that erupts with bright rosy wine flowers in the fall ( & normally a surprise bloom cycle in the spring). Upright, clumping branches are covered with small, dark green leaves. Gorgeous yellow fall foliage before the leaves drop. Prune in early spring to keep it 5'tall x 5'wide. Left un-pruned in spring, it can grow 10-12' tall x 8' wide – as you can see in the photo above. Sun or part sun. Pruning 'Little Volcano' is easy so you can keep it the size that you want.
