В	Watermellon												

Α	Halfwidth (double rows) 12"-14" apart
В	Double width (skip rows) t" apart. All others regular 36" apart including tomato in wire cages.
2	For cabbage plants, plant seed indoors December 30.
3	For lettuce plants, plant seed indoors January 10.
4	For eggplant plants, plant seed indoors in February.
5	For pepper plants, pla nt seed indoors March 1.
6	For tomato plants, plant seed indoors March 1.
To 000	and risk with susumber, against muskmalan, tamata, squash and watermalan, usa betkans or delay planting two weeks

To escape risk with cucumber, eggplant, muskmelon, tomato, squash and watermelon, use hotkaps or delay planting two weeks.

Note: Crops usually do best when planted in the earlier part of each period shown. Spring planted tomato, eggplant and okra usually bear until frost.
