

Advanced Training: Plant Pathology

The Advanced Training in Plant Pathology for Extension Master Gardeners will enhance your understanding of plant diseases and boost your confidence in diagnosing plant health problems. This two-part training will help you:

Registration and access for e-learning course opens November 4, with morning and afternoon sessions over November 18th and 19th. The E-Learn Course is to be taken prior to Zoom Sessions.

- Recognize plant disease symptoms
- Learn the differences between types of plant diseases

Part 1: Introductory E-learning Course

Will be available online through AgriLife Learn

- Covers basics of plant pathology: bacteria, fungi, viruses, and nematodes
- Includes quizzes and a discussion board for introductions, goals, and questions
- Access to content opens Monday, November 4th
- Complete this portion of the training at your own pace **before** the Zoom sessions.

Part 2: Advanced Zoom Sessions

- Focuses on case studies of plant pathogens.
- Topics: infection, environmental impact, and disease management.

Day 1, Monday, November 18th:

Bacteria (8:00am - 11:00am), Fungi (1:00pm - 4:00pm)

Day 2, Tuesday, November 19th:

Virus (8:00am - 11:00am), Nematodes (1:00pm - 4:00pm)

*All times in Central timezone

Zoom links will be provided after completing the e-learning portion of the course.
