

Below are two websites I made reference to during my talk on butterfly gardening.
Enjoy.

The Dallas County Lepidopterists' Society

The Dallas County Lepidopterists' Society was established in 1995. Its purpose is to provide a forum where people may gather to share an interest in butterflies and moths, whether that interest takes the form of collecting, gardening, photography, study or casual observation.

Regular monthly meetings generally take place locally. As a member, you will notified of all meetings and field trips by email.

Membership is free and open to anyone (*you do NOT need to live in Dallas County*). To join, just send an email message to [Dale Clark](#), and include your email address and physical mailing address.
