1454			Notes:										
1455													
1456			I tried to highlight everything in column "A" with red lettering if there were differences. Call me if this doesn't make sense or you have questions: Darrell Pray / 361-219-9062										
1457													
1458			When you look over the list you will see some of the duplicate plant lists with lettering highlighted in red. This will hopefully let you review the items that I noticed that had a slight difference. It could have been nothing put in the column of one on the tour notation or it could have been words that were put in a different order or words that were just different or different in some way. This is not to say that I was right, I just wanted to indicate that ya'll might want to pay special attention to these and try to get the notations corrected if needed.
