

Fresh Strawberry Pie

Submitted by Jane Bowman

Ingredients

3/4 cup sugar

1 baked pie shell

3 rounded tablespoons cornstarch

3 rounded tablespoons dry strawberry Jello or a small package of Jello

1 cup boiling water

enough cleaned and sliced strawberries to fill a pie

whipped topping

Use a wire whip to mix the dry ingredients very very well. Put the dry mixture in a pan on the stove over heat and stir the mixture constantly as you pour in 1 cup of boiling water and bring to a slow boil. Continue to stir the boiling mixture until it thickens and becomes clear, not cloudy. Set aside and let it cool.

In a large bowl, mix the strawberries into the mixture. Pour it into the baked pie shell and add a whipped topping. Garnish the top with a fresh sliced strawberry.

Recipe can be varied by adding different fruit such as peaches and peach jello.
